## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-20 and 22-32 allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: Prior art failed to establish a thin film transistor on an liquid crystal display device where the drain electrode is formed on an ohmic contact and the drain electrode has an uneven width.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claim 21 rejected under 35 U.S.C. 102(e) as being anticipated by Hebiguchi et al. (6,707,441).

Hebiguchi et al. disclose an active matrix type liquid crystal display device and substrate for the same where in Fig. 17 it shown gate and data lines and thin film

Art Unit: 2826

transistors are formed at the crossing points of data and gate lines and drain electrode is connected to the pixel electrode. Furthermore, in Claims 14, 23 and 32, Hebiguchi et al. disclose the uneven width requirement of the drain electrode.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.
